

DB Final Project - Report 1

Our group proposes creating a new and local diving equipment shop called Sunshine Scuba Shop. The purpose of our website is to create an environment where users can purchase scuba diving equipment and be able to book scuba diving trips around the shop.

The website will allow customers to register with basic information. Their payment information will be linked and saved with their account. They will be able to look at the list of products on the site and make orders. After their order is taken, the employees will be able to check and make updates.

Another additional feature that customers can use is the booking of dive events. When they book diving events they have the option to rent diving equipment.
